computer knowledge-information system mcq online test-paper2

In what phase procedure development occurs?

A Structured design

B System building

C Maintenance

D Conversion

Answer : C

The planned use of networked information and communication technology for the delivery of training is called

A e-learning

B blog

C programmed learning

D None of these

Answer : A

The time lag between the keying of the last character on the keyboard input and the appearance of the first output character on the screen, is called

A Batch processing

B Response time

C System review

D Key

Answer : B

Identify the correct pair from the following

A Ubuntu — Operating System

B Excel — Word Processing Software

C AVI — File Transfer Protocol

D HDD — Cloud Storage Facility

Answer : A

Which of the following is a graphic representation of the modules in the system and the interconnection between them?

A System chart

B Structural chart

C Flow chart

D Pie chart

Answer : B

Which of the following is generally not contained in a feasibility document?

A Dataflow diagrams

B Project name

C Problem descriptions

D Feasible alternative solutions

Answer : A

Satellite communication works through

A Radar

B Transponder

C Receptor

D Transmitter

Answer : B

A channel for communicating across a boundary between two or more subsystem is known as

A Data path

B Walk through

C Act gram

D Interface

Answer : D

The actual physical network of wires, cables and satellite that connects computers and resources throughout the world is the _____

A Web

B Internet

C e-commerce

D Social media

Answer : B

During what phase, the requirements analysis is performed?

A System investigation phase

B System analysis phase

C System development phase

D System design phase

Answer : B

GPS is owned and operated by

A   US

B   China

C   Russia

D   France

Answer : A

The systems conversion technique of totally removing the existing system and immediately implementing the new system is called

A   Pilot conversion

B   Parallel run

C   Crash conversion

D   Phased conversion

Answer : C

Which of the following represents one billion characters?

A   Kilobyte

B   Megabyte

C   Gigabyte

D   Terabyte

Answer : C

Encoding or scrambling data for transmission across a network is known as ___

A   Decryption

B   Encryption

C   Protection

D   Demonization

Answer : B

On a systems flowchart, the online manual keying of input data is identified by using

A   Online keyboard symbol

B   Manual operation symbol

C   Keying operation symbol

D   Online storage symbol

Answer : A

This technology allows a phone call to be routed over network wires.

A   VOIP

B   teleconferencing

C   video-conferencing

D   None of these

Answer : A

Cloud computing means

A   Computing using the cloud

B   Computing using cloud chamber technology

C   Computing which results in errors

D   Shifting computing power from offline PCs and Laptops onto the Web

Answer : D

Networks of end user PCs connected to network server to share software, processing, and databases. The best fit will be

A   Internetworked enterprise

B   Electronic commerce

C   Enterprise collaboration

D   Client/server computing

Answer : D

Structured design methodology is an approach to design that adheres to rules based on principles such as

A   Data flow analysis

B   Top-down refinement

C   Bottom-up design

D   All of these

Answer : A

ICT (Information and Communication Technology) includes:

A   E-mail

B   Internet

C   Educational TV

D   All the above

Answer : D
